All distances should be considered approximate. The originals were calculated by Captain Bob and Weekends using Garmin GPS Software and measured along the center of the channel. (Your actual boating distance might be slightly more or less.) Those updated since the original version were using the satellite mode google maps measure feature and also following center of the channel.

•Note: Wolf Creek Marina WCM was once called Cave Springs Marina and before that the dock was located where Highway 76 ends at Alligator Creek and was called Alligator I. •Note: London Dock is no longer operational or even exists in its old location. No fuel, no transient docks. That location is where the measurement is to; is where the Lake and the Rockcastle River intersect 36.959901, -84.357303, The dock is now located at 36.945366, -84.415990 in a side creek and is known as Boone Docks Resort. You should check ahead before making plans with Boone Docks Resort. (On 5-14-2021, corrected several measurment discrepancies that were calculated off of mileage from the original chart, there are more updates to make but most should be fairly accurate now. Feel free to suggest verified corrections screenshots are appreciated. Significant changes made to London and Boone Docks distances), 7-28-2021 Fixed one left over mileage issue with London dock in a row that wasn't upated. Added Camp Earl. 7-8-22 Corrected LFM BRM measurements, 7-2-2024 added Sid Bell Falls
